

SOFTWARE TO RUN THE FLOOR

Carcass-to-case traceability, without the binder room.

V5 Ultimate is the AI-assisted operations platform meat & sausage manufacturers use to run the shop floor end-to-end: electronic batching and weighing, in-line quality, lot & pallet traceability, OEE, labour, maintenance, document control, supplier portal — wired to your scales, printers, PLCs and ERP. Rapid onboarding in days, not months.

AI-ASSISTED

USDA FSIS · 9 CFR PART 416-417 · FSIS HACCP · BRCGS · SQF · FSSC 22000

One system for the whole meat & sausage floor – not just MES.

V5 Ultimate replaces the patchwork of spreadsheets, paper batch sheets, standalone weighing PCs, separate QA tablets and bolt-on traceability apps with **one platform** that runs production, quality, traceability, maintenance, labour and supplier control from the same data spine. Built for meat & sausage. Designed for the floor.

<p>P</p> <p>Production</p> <p>Electronic batching, weighing, recipe execution, scheduling, OEE, downtime & labour — live on the floor.</p>	<p>Q</p> <p>Quality</p> <p>In-line checks, CCP/oPRP monitoring, NCRs, CAPA, allergen control, document control, audit-ready records.</p>	<p>T</p> <p>Traceability</p> <p>Lot, pallet, ingredient and finished-good genealogy. Recalls in minutes, not days.</p>

SAP, NetSuite, Sage, MS Dynamics, Oracle — bidirectional.</p>

Faster decisions. Faster go-live.

AI is woven through V5 — not bolted on. It triages quality issues, predicts yield drift, drafts CAPAs, summarises shifts and answers operator questions in plain English on the kiosk. And because the platform ships pre-configured for meat & sausage, you go live in days.

AI INSIDE

Ask V5 — the AI co-pilot for your floor

Operators, supervisors and QA managers ask V5 in plain English. V5 answers from your real production data, your SOPs and your audit history — instantly.

- ▶ **Yield prediction** — flags the SKU/line/shift drifting toward a giveaway loss before it lands on the P&L.
- ▶ **QA triage** — auto-classifies in-line failures, suggests root cause, drafts the CAPA and assigns it.
- ▶ **Shift summary** — a one-page brief at every handover: production, downtime, NCRs, what's at risk.
- ▶ **Operator co-pilot** — "Where's my next changeover?" "What's the next step?" — answered at the kiosk.
- ▶ **Audit prep** — V5 assembles the audit pack from live records, mapped to your regulators and certification bodies.

Live in 14 days

RAPID ONBOARDING PROGRAMME

- Days 1-2 · Kick-off & data import**
SKUs, BOMs, recipes, suppliers, scales, printers, users — imported from your ERP and spreadsheets.
- Days 3-5 · Configure & connect**
Kiosks online, scales paired, printers calibrated, ERP link tested, QA templates loaded.
- Days 6-9 · Pilot line live**
One line on V5, end-to-end. Real batches, real labels, real traceability. Operators trained at the kiosk.
- Days 10-12 · Roll across the floor**
Remaining lines added. Daily standup with CSM. Reports tuned to your management cadence.
- Days 13-14 · Handover & audit-ready**
System owner trained. Mock recall passed. Evidence pack generated for your standards.

Audit-ready out of the box — globally

Evidence packs pre-mapped to the standards your regulators, customers and certification bodies require — across the UK, EU, North America, Australia & APAC.

WHY V5 ULTIMATE

Six things every meat & sausage operator notices in the first week

01

Cook & chill in the lot record

Probe temps, dwell time, chill rate captured live; deviations halt the shift and trigger a CAPA.

02

Pre-shipment review gate

Lots can't ship until a designated reviewer has signed off — system enforces, not memory.

03

Label-version on every lot

The exact FSIS-approved label version that ran is recorded with the lot.

04

Withholding-ready

Affected lots and downstream customers identified in seconds, not shifts.

05

AI does the busywork

Triages NCRs, drafts CAPAs, summarises shifts, predicts yield drift before it hits the P&L.

06

Your ERP gets clean data

Bidirectional with SAP, NetSuite, Sage, MS Dynamics, Oracle. No more midnight reconciliations.

V5 replaced three systems and a filing cabinet. Our last audit took half the time, and the auditor walked to a screen – not a binder.
