

DISPATCH · V5 ULTIMATE

Every lot in, every lot out, linked to the batch.

A checklist for production and quality teams: confirm that input lots, intermediates and partial shipments are linked, and how consumption from several lots is recorded.

INPUTS

INTERMEDIATES

CONSUMPTION

SHIPMENTS

Is the genealogy whole?

Tick each line for one batch.

CHECK	WHAT TO CONFIRM	OK?
Input lots	Every lot allocated to the batch is recorded	☐
Same material, two lots	Both are linked, not only the first	☐
Intermediates	The sub-batch is linked to the job that uses it	☐
Output	The finished lot is linked to its work order	☐
Shipments	Each partial shipment of the lot is recorded	☐

Two lots of one material

The same 60 kg, recorded two ways.

BATCH	INPUT LOTS	STYLE	CHECKED BY
☐	☐	☐	☐

ILLUSTRATIVE EXAMPLE · INVENTED NAMES AND VALUES

LOT ALLOCATED	AVAILABLE	USED IN ORDER	SPLIT PROPORTIONALLY
M-0931	40 kg	40 kg	26.667 kg
M-0935	50 kg	20 kg	33.333 kg
Total	90 kg	60 kg	60 kg

Fictional WO-0142 needs 60 kg of Material B. It also uses Intermediate A lot I-0141 from sub-job WO-0141 (made from Material A lot L-0921). Lot P-0142 then ships to Customer A and Customer B.

Before you rely on it

Answer these for your own process.

- ☐ How is rework recorded today, and what links does it keep?
- ☐ How are repacks relabelled and linked?
- ☐ Which consumption style suits each material?
- ☐ Who checks the genealogy before release?

WHERE V5 FITS

- Several lots can be consumed, split proportionally or used in order.
- Linked sub-job outputs feed downstream jobs.
- Rework and repack genealogy is not claimed; confirm with us.
- Limit: workflows, fields and sign-offs follow your procedures, workspace configuration and user permissions.

Trace a batch with us

Bring one batch and we will show its genealogy in V5.
